

# Electronic Monitors & Controllers

## Electronic Monitors & Controllers

For updating your sprayer or other farm equipment for more accuracy when sowing, seeding, spreading or spraying, consider this range of monitors & controllers.

ORDER CODE	DESCRIPTION	\$ (EX. GST)	\$ (INC. GST)	PROD. CAT.
MT01000	Calc-an-acre area/speed/distance meter. Ideal for fitting to any implement or vehicle where a record of area covered, travel speed or distance measurement is required. Liquid crystal backlit display for day/night use. Can store up to three separate areas at once.	715.52	787.07	Y
MT01022	FlowTrak spray monitor. Records distance, area and litres used and can display speed, flow rate and calculated litres per hectare spray rate. Ideal for greatly improving the accuracy of spraying and recording areas covered and liquid used. Comes with a flowmeter & all hardware to fit as a kit.	2,298.15	2,527.97	Y
MTSMATE	Spraymate auto-rate spray controller. Fully automatic spray rate controller for fitting to a sprayer that has existing electric solenoids or 3-wire motorised valves fitted. Capable of up to 3-section boom control, this compact controller can show area, speed, flow rate, litres per hectare, total liquid used and area per hour. The memory records area, distance & liquid used.	2,364.87	2,601.36	X
MTSMATE-ARAG3	Spraymate 3-section auto rate controller complete with all wiring looms, hardware, a rapid-check flowmeter and 3 motorised boom-section valves for fitting to an existing boomsprayer as an upgrade for manual or basic electric controls. This kit comes with all the components for a complete upgrade. The controller console displays litres per hectare (application rate) or any other function selected by the rotary selector, and can record area, liquid pumped and distance travelled. Suitable for applications up to 20-bar pressure.	4,061.50	4,467.65	X
MTSMATE-BRAG2	Like the MTSMATE-ARAG3, this is a Spraymate auto-rate controller using 2-section motorised ball valves for spraying pressures up to 40-bar. (not pictured)	4,162.33	4,578.56	X
MT01425	GPS speed sensor for fitting to MicroTrak auto-rate controllers in place of the older style wheel sensors & magnets. This useful receiver is a 5 hertz system suitable for a full travel speed range.	599.00	658.90	Y
